

Custom Software Dev for EdTech Company

PROJECT DETAILS

 Custom Software Development

 Nov. 2021 - Jan. 2022

 \$10,000 to \$49,999

"We were really happy with the level of communication and professionalism."

PROJECT SUMMARY

Beehive Software Inc. developed custom software for an educational technology company's overall system. The team built the front- and backend of the learning platform and integrated it with HubSpot CRM and CMS.

PROJECT FEEDBACK

The client was pleased with the final product, which was delivered on time and in excellent condition. Beehive Software Inc. demonstrated professionalism and expertise on the subject. Communication was efficient via virtual meetings and email.

The Client

Please describe your company and position.

I am an executive of CodeOp

Describe what your company does in a single sentence.

Ed-tech startup brushing technical talent development with diversity and inclusion.

The Challenge

What specific goals or objectives did you hire Beehive Software Inc. to accomplish?

- Build and deploy an asynchronous learning platform and link it to our CRM

 Executive, CodeOp

 Education

 Barcelona, Spain

CLIENT RATING

5.0

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

How did you find Beehive Software Inc.?

Referral

Why did you select Beehive Software Inc. over others?

- High ratings
- Great culture fit
- Referred to me
- Company values aligned

How many teammates from Beehive Software Inc. were assigned to this project?

2-5 Employees

Describe the scope of work in detail. Please include a summary of key deliverables.

- Build a frontend app for students to sign-in and access course modules
- Build backend in which data structure supports all the functionality including an API layer with endpoints for the frontend to communicate with the backend
- The backend will allow running the Python code for the exercises inside docker containers for security (and stability) reasons.
- Integration with HubSpot CRM
- Integration with Content Management System

The Outcome

What were the measurable outcomes from the project that demonstrate progress or success?

Software development of the overall system. Each main deliverable will include the full codebase in a GitHub repo. The software development will include:

- Frontend for students
- The CMS
- The backend to support everything
- 2 small design iterations depending on feedback
- Time scope: 1-2 months

Describe their project management. Did they deliver items on time? How did they respond to your needs?

Beehive stood out

What was your primary form of communication with Beehive Software Inc.?

- Virtual Meeting
- Email or Messaging App

What did you find most impressive or unique about this company?

Hh

Are there any areas for improvement or something Beehive Software Inc. could have done differently?

Overall, we were really happy with the level of communication and professionalism. We've dealt with a lot of sloppy developers in the past so it was a breath of fresh air to have a project handled on time and in good working condition.
